

Fourth Annual Northeastern Glenn Symposium on the Biology of Aging

**Wednesday November 7, 2018
New Haven Lawn Club, New Haven, CT
Sponsored by the Glenn Foundation for Medical Research**

**Organizing Committee: Morgan Levine, Ph.D., Al Shaw, M.D., Ph.D., Heidi Zapata, M.D., Ph.D.
Yale School of Medicine**

This regional, one-day symposium will highlight research advancements in understanding the biology of aging and its implications for human health

The goals of this meeting are to:

- Provide a venue for scientific exchange among academic investigators in the Northeast focusing on aging research
- Promote inter-institutional collaborations in aging research
- Give graduate students and postdoctoral associates the opportunity to present their research and get feedback in an intimate setting with local experts in the aging field.

Registration and call for abstracts. The meeting is free to all attendees and includes breakfast and lunch. Talks and posters will be by graduate students and postdoctoral associates, who should send an abstract for consideration providing a project title, presenter's affiliation, graduate or postdoc status, and a brief project description of 250 words or less. Posters and talks will be chosen from submitted abstracts. For those attending but not submitting an abstract, please provide your name, title and affiliation. ***Meeting registrations and abstracts should be emailed to Al Shaw (albert.shaw@yale.edu) by October 15, 2018.***

Travel and venue. The New Haven Lawn Club (www.nhlawnclub.com) is centrally located at 193 Whitney Avenue, close to the I-91 and I-95 highways and a short taxi ride from Union Station New Haven (Amtrak and Metro-North). Free parking is available for attendees. Please note that we are unable to reimburse travel expenses or lodging.
