Aging Biology Update

Brought to you by the **UAB NATHAN SHOCK CENTER OF EXCELLENCE IN THE BASIC BIOLOGY OF AGING**

Featured

[Big news: Ready for prime time? Yamanaka factors primed to treat glaucoma in humans](#)

Basic Biology

[Microbiome-mediated dysfunction of gut-brain communication drives age-related cognitive decline in mice](#)

[Klotho protects against Parkinson's disease \(PD\) in a mouse model with intriguing parallels in people with PD](#)

[It's in Z-DNA: aging alters DNA structure–induced genetic instability in mice](#)

[Localized activation of \$\beta\$ -adrenergic-like signaling delays aging in flies](#)

[Mitochondrial genome integrity is necessary for mouse lifespan extension by reduced IGF-1 signaling](#)

[Basophils resolve inflammation and promote wound healing in aged and adult mice](#)

Review: [Sex-specific immune responses throughout the lifespan](#)

Review: [Sex differences in response to longevity interventions in laboratory mice](#)

Preprint: [DNA methylation clocks get the blues: the comparison population matters](#)

Commentary: [Can the cellular stress response unravel Peto's paradox?](#)

Meeting report: [12th ARDD meeting, 2025](#)

Clinical

[SGLT2 inhibitor lowers stroke risk in people with diabetic retinopathy](#)

[Treatment and treatment outcomes are not associated with older cancer patients' preference for quality of life over extended survival](#)

[Despite different underlying mechanisms, absolute and functional iron deficiency are associated with increased risk of dementia](#)

[Older adults leave the Emergency Department with medications discouraged by the Geriatric Emergency Medication Safety Recommendations](#)

[Modifiable risk factors associated with early-onset dementia](#)

[Delirium is more common in people with dementia but more deadly in cognitively unimpaired older adults](#)

[Thiazides pose a clinically significant risk of hyponatremia in older people, especially older women, compared to calcium channel blockers](#)

Review: [Cellular senescence in cancer](#)

Epidemiology/Demography

[Cohort study finds \$\alpha\$ -synuclein pathology is selectively associated with accelerated tau accumulation in women only](#)

[Longitudinal study \(BLSA\) finds skeletal and cardiac muscle mass and function decline in sync](#)

[Exposome-wide patterns predict brain health in aging](#)

[Stability and drift in the individual rate of senescence](#)

[Physical and social exposome alters brain aging trajectories](#)

Women's Health and Aging

[Early menopause \(<50\) associated with increased risk of multimorbidity and mortality](#)

[Older women with hypertension are more likely to develop and less likely to receive treatment for chronic kidney disease and kidney failure](#)

[Phosphorylated tau 217 in cognitively unimpaired women is associated with cognitive impairment and dementia 25 years later](#)

[Iatrogenic menopause and long-term health: a call for better evidence](#)

[Radon exposure associated with ovarian cancer in postmenopausal women](#)

Review: [Resistance training improves strength and body composition among women at all ages measured](#)

Review: [Environmental and endogenous stressors driving oocyte aging](#)

Energetics/Nutrition

[Reducing the rodent strain effect on calorie restriction](#)

[Small RCT suggests that boosting dietary intake of phytochemical rich foods improves aspects of health in older men](#)

[Exercise reverses age-associated mitochondrial dysfunction in skeletal muscle in mice](#)

Special Issue: [The integrative biology of exercise](#)

[Cardiac mitochondrial oxidative energy metabolism in aged rats improved by exercise via PGC-1 \$\alpha\$ pathway](#)

[Maternal mouse exercise associated with shift from subcutaneous white to brown adipose tissue in offspring](#)

[Recommendations for standardizing exercise protocols in laboratory rodents](#)

[The negative association between human resting metabolic rate and age persists even after adjusting for body composition and sex](#)

Evolution/Comparative

[Mitochondrial DNA evolution in fishes linked to longevity](#)

[Comparative analysis of four FOXO genes across short- and long-lived mammals](#)

[Laboratory evolution reveals flies from predictably fluctuating environments show enhanced survival in a common garden assay](#)

[Segregation of mtDNA mutations protects mitochondria in Eukaryotes](#)

Review: [Molecular mechanisms and variation in animal aging](#)

Novel Organisms

[Mated females in fly species without sex-peptide show no reduction in lifespan](#)

[Reduced mitochondrial capacity and increased mitochondrial efficiency associated with increasing age in a long-lived sea bird](#)

[Eleonora's falcon \(*Falco eleonora*\) shows greater breeding success at older ages](#)

[When captive guppies get old, they aren't so bold and them as is bold don't get very old. Males are bolder but females get older and that is the fish story as told yer](#)

[Heritable longevity, long-lived females and short-lived males in the yellow-bellied marmot](#)

[Genome-wide DNA methylation patterns predict age in the zebra shark and show similarities to other vertebrates](#)

Review: [Begin at the beginning: larval zebrafish as models for age-associated neurodegeneration](#)

Resources

[AEGIS: a program for exploring the evolutionary biology of aging *in silico*](#)

[A reference of functional connectivity in the human neocortex from birth to 100 years](#)

[A standardized protocol for mouse longevity studies for drug development](#)

Caregiving

[Unionization and public ownership associated with lower turnover of direct care workers](#)

Policy/Ethics

[Reinstatement of the 3-day rule is associated with longer hospital stays and no improvements in outcomes](#)

[You *can* make this stuff up: AI's science citations are frequently fictional and often undetected. Now what?](#)

[Long-term care insurance reduces catastrophic health spending and improves end-of-life health in China](#)

Commentary

[GLP-1 receptor agonists should be rigorously tested as longevity therapeutics](#)

[The case for space flight as a model of accelerated aging](#)

[Longevity Clinics: the good, the bad, and the ugly](#)

[Time-restricted eating in Alzheimer's disease: A call for research](#)

[Timing matters in population epigenomics](#)

[Delphi's Achilles' heel: when expert agreement trumps evidence in geriatrics](#)

[Dandelion strong! Aging with HIV](#)

[TMI? MRIs in older patients reveal asymptomatic, age-related changes](#)

Odds and Ends

[The largest study of longevity of professional wrestlers to date](#)

[Orson Welles, eat your heart out: bixonimania conquers AI and the peer-reviewed literature](#)

[Preliminary data suggests privilege extends human lifespan, magic mushrooms not so much](#)

Aging Biology Update is brought to you by the UAB Nathan Shock Center and compiled by Kathleen Fischer and Steven Austad.
