

Metabolomics Funding Opportunity!

Funding
Available
Immediately!

Applications
accepted on a
rolling basis.

The Metabolomics Core at the University of Washington's Nathan Shock Center invites proposals from new collaborators.

The metabolomics core provides:

- Support with design and execution of experiments using metabolomic profiling to ask aging-related questions
- Sample preparation and metabolomic profiling (can *fully fund* up to 100 samples per project)
- Support with statistical analysis of metabolomic studies of aging
- Network analysis of metabolomic profiles in

aging-related studies

If interested, please submit your ***CV/Biosketch and 300 word abstract*** describing your aging-related question and proposed study design to Ellen Cravens at cravense@uw.edu. Proposals will be evaluated on a rolling basis.
