

CALL FOR APPLICATIONS: 2022-2023 San Antonio Nathan Shock Center Pilot Grants

2022-2023 Awards Supported by the San Antonio Nathan Shock Center.

Awards expected to be made beginning October 1. If you are interested in applying, please contact the relevant core leaders as soon as possible. See instructions at <https://nathanshock.barshop.uthscsa.edu/rfa-support-core-service>

The San Antonio Nathan Shock Center is soliciting applications to support the research of any investigator who is developing a new project in the basic biology of aging.

Applications are accepted from investigators at any US academic institution. Junior investigators are encouraged to apply. We can consider applications from any investigator who is eligible to receive NIH grants according to the rules of their home institution.

The projects should utilize one or more Cores of the Center. Projects that propose creative uses of more than one Core are encouraged. Cores and their capabilities are listed at <https://nathanshock.barshop.uthscsa.edu>

Projects that use the services of any of the cores are encouraged. However, we are particularly interested in supporting projects that involve: lipidomics; single cell biology; circadian rhythms; musculoskeletal system (including use of micro CT); development of novel drugs that could affect aging, including drug screening/discovery. See instructions and grant conditions at <https://nathanshock.barshop.uthscsa.edu/rfa-support-core-service>
